Re: Concerning Promolux Balanced Full Spectrum Lights:

Thank you for your recent installation of the Promolux Balanced Full Spectrum Lights.

"Procedures in the office, and the staff's response has been overwhelmingly positive. When it comes to skin tone, texture, and details, the PAR 38 Promolux PW LED's are truer to detail than any other product, or combination of products we have tried in the office. I look forward to experimenting with more Promolux products moving forward, to fine tune and optimize each individual treatment's lighting. Based on the PW PAR 38's results, the sky is the limit and we at Abbracci Med Spa could not be any more thrilled. "

Luis Abrishamian,

MD Owner and Medical Director,
